

# UNIVERSITY GOVERNANCE IN THE 21<sup>ST</sup> CENTURY: Meeting the Challenges of Openness, Accountability, and Democracy

## A NATIONAL CONFERENCE

March 3–4, 2017

Segal Building, SFU Downtown Campus, 500 Granville Street, Vancouver, BC

Presented by the Confederation of University Faculty Associations of BC

## ABOUT

University governance is an increasingly complex and contentious issue at Canadian universities. As institutions try to balance multiple priorities in a competitive environment, critical issues such as transparency, accountability, and democracy are putting many existing governance models under intense pressure.

This national conference will provide a valuable opportunity for faculty, staff, university administrators, and government policymakers to address policy challenges and discuss best practices that could form the basis of more effective models of collegial governance.
